FEDERICO DI NATALE

JUNIOR WEB DEVELOPER

I discovered my passion about programming two years ago when I started to automate my life using Google Script.

During the past year I enrolled in the "Full-Stack Web Developer Bootcamp" at The App Brewery and the Bootcamp "Full Stack Developer" at Aulab.

Currently I've joined the CS50 course at Harvard University in order to add another layer of knowledge.

My skills are focused mainly on HTML, CSS3, Bootstrap and JavaScript.
